🌐 diego-vargas-urzagaste-40411a3bb

Systems Engineering student who takes projects from idea to production – web apps, APIs, and databases across TypeScript, C#, PHP, and Python. Delivered measurable operational improvements for a real client and maintain bilingual technical documentation.

Experience

Universidad Privada Domingo Savio

Tarija, Bolivia

Teaching Assistant – Intro to Programming & Programming I

Aug. 2023 – Jul. 2024

- Increased tutored students' pass rate by 20% through targeted exam preparation and practice materials
- Facilitated 40+ reinforcement sessions handling 150+ individual academic requests across two semesters
- Reduced assignment dropout rate by 30% by implementing a weekly student progress tracking system
- Enriched sessions with advanced topics: data structures, clean code, and algorithmic problem solving

Education

Universidad Privada Domingo Savio

Tarija, Bolivia

Bachelor's in Systems Engineering – Final semester, GPA: 85/100

Feb. 2022 – Feb. 2027

Projects

LION Business Manager — Invoicing and management system for a design and marketing agency

Mar. 2026

- Delivered end-to-end for a digital design and marketing agency – from initial consultation to production
- Reduced invoicing process from 1 hour to 15 minutes: 75% operational improvement
- Architected the PostgreSQL schema with stored procedures in PLpgSQL and the React 19 frontend (1.1MB TypeScript)
- Covers quotes, job tracking, client management, and invoicing in a single platform
- Technologies: React 19, TypeScript, Tailwind CSS v4, Supabase, PostgreSQL

Brecha Digital — BI pipeline on Bolivia's digital skills gap

Apr. 2026

- End-to-end BI pipeline on Bolivia's digital divide: medallion ELT architecture (Bronze/Silver/Gold) with 9 KPIs across 4 dashboards
- Gap analysis via fuzzy matching against real job vacancies extracted by a Groq LLM from employment portals
- Regional benchmark comparing Bolivia against 17 Latin American countries using CEPALSTAT SDG 4.4.1 data
- AI assistant for natural language queries over the full dataset; deployed on Streamlit Cloud and presented at Expotec UPDS 2026
- Technologies: Python, SQL Server, Streamlit, Groq API

InnHub — Hotel management platform (in development)

May 2026

- Hotel management MVP with 12 functional modules, 14 domain entities, and 5 access roles
- Clean Architecture with feature-based organization, Atomic Design, encapsulated services, and business rules as pure testable functions
- Complete bilingual documentation (7 docs): product, MVP scope, domain model, stack, architecture, Git workflow, and functional specification
- Deployed on Vercel with Vitest; GitHub Project with 20 roadmap issues and 4-branch workflow
- Technologies: React, TypeScript, Tailwind CSS, InsForge, PostgreSQL, Vitest

StackWise — Tech hiring platform through coding challenges

Nov. 2025

- Mobile hiring platform connecting developers with companies through real coding challenges
- Candidate profiles, challenge evaluation flow, and company matching dashboard
- Academic project presented and evaluated at Expotec UPDS 2025
- Technologies: React Native, TypeScript, Supabase, Zustand, Expo

Tourism Microservice — REST API for tours, bookings and payments

Jul. 2025

- REST API covering the full tourism cycle: tour catalog, user registration, capacity-validated bookings, and payments
- Dockerized with Docker Compose – API and SQL Server 2022 as isolated services, single-command startup
- Automatic migration and seeding on container startup with EF Core; zero manual configuration
- Academic project presented and evaluated at Expotec UPDS 2025
- Technologies: ASP.NET Core 9, C#, Entity Framework Core, Docker, SQL Server

eCommerce B2C — Online store with admin panel, shopping cart and PDF reports

Apr. 2025

- Full-featured online store with product catalog, shopping cart, checkout flow, and admin panel
- PDF invoice generation, order management, and role-based access (admin/customer)
- MVC architecture with Eloquent ORM, Blade templating, form validation, and session-based cart
- RESTful routes, responsive UI, and MySQL database with seed data
- Technologies: Laravel 12, PHP, Blade, MySQL

Skills

Languages	TypeScript, C#, PHP, Python, JavaScript, SQL
Frameworks	React 19, React Native, ASP.NET Core, Laravel, Astro, Expo, Vitest
Databases	PostgreSQL, MySQL, MongoDB, Supabase, SQL Server
Tools	Git, Docker, Linux, Vercel, Streamlit, Docker Compose, InsForge, Scrum
AI Tools	Pi Agent, OpenCode, Codex
Competencies	Teamwork, effective communication, problem solving, self-taught, continuous learning, organization, planning, leadership, and proactivity
Spoken	Spanish (Native), English (Intermediate — technical reading, writing and conversational)
